

EGit Name: \_\_\_\_\_

Practice Class: \_\_\_\_\_

GITHub Eclipse Date: \_\_\_\_\_

Create a new GITHub repository:

\*) lastname\_sales

griesmayer\_sales

Create the class Customer:

<b>Customer</b>
- customerID: int
- firstName: String
+ Customer(...)
+ get/set

Upload the project on the github server.

Create the class Customers (ArrayList).

Modify the class Customer.

<b>Customer</b>
- customerID: int
- firstName: String
- credit: double
+ Customer(...)
+ get/set

Upload the project on the github server.

Clone a project of your classmate.
