

Oracle
Practice
Storage

Name: _____

Class: _____

Date: _____

Set the database to the archived log mode and restart it.

Create a new TABLESPACE:

Name:	SHOP_LASTNAME	SHOP_GRIESMAYER
Datafile:	shop_lastname1.dbf	shop_griesmayer1.dbf
Size:	200 MByte; autoextend up to 300 MByte	
Datafile:	shop_lastname2.dbf	shop_griesmayer2.dbf
Size:	100 MByte	

Keep the SQL-Statements for this task!

Create a new USER:

Name:	LASTNAME	GRIESMAYER
-------	----------	------------

Copy the demo user.

Create the table and insert some lines:

```
CREATE TABLE griesmayer.product
(
    product_id INTEGER PRIMARY KEY,
    product_name VARCHAR2(20),
    product_price DECIMAL(10,2)
)
```

Check the datafiles in the shell.

Remove the datafiles and let Oracle recover the information!
